

VILTRACIA WAMBUI

To you Mr Tom, Mrs Katie and all my sponsors.

Hi I hope you are fine for me I am very fine here in school, and everything is well.

Mr Tom and Mrs Katie have been taking good care of us as they are so loving, friendly and generous.

In the first day of school I was so surprised and full of questions of how life in boarding is like because I had never stepped a boarding school after some days I came to realize that boarding life is so cool. Thanks to you I am there.

At school we eat cultural food like Githeri, Ugali and porridge and tea. If you ask Mr Tom he knows how to prepare and to cook all this foods because he loved Githeri, and Ugali with kales.

My best subject is CRE. I love it because of our teacher he teaches us very well and at the end of the class everything is flowing in your mind, and he is so funny.

The subject that's hardest for me is mathematics because I was so anxious because I didn't know how form 1 maths looked like at was my first paper.

I had very good friend she is a girl of disability and she's a God fearing person. Her best subjects are physic, Biology and Kiswahili and love her very much.

My family is fine at home and I also miss them.

My mum and she is a hardworking woman. I love her so very much because whatever little she have she appreciates it. She is also kind and friendly and she does everything with determination. My dad does casual worker and he is also a hard working man, he is also a determined person and very friendly. They are my Royal model. ~~fit~~

I like Christ the King because once it performs

Very well in exams mainly the National exams
K.C.S.E and the teachers here are very kind and
they are very humble to their pupils.

The interesting subject that I learned in school is
Agriculture because it helps someone how to produce
things naturally.

After one week in school I started making friends
from other forms and as we were sitting in the
dormitory we started chatting with one another and one
of the girls asked have you heard someone by the
name pipette in this school, because I had not heard
any name of that kind. I suggested my opinion that
pip was a name of a dog and pette is an animal that
is kept at home as a companion and treated kindly.

No sooner had I finished the word kindly than
they all bursted in laughs and even others dropped
tears from their eyes and I was left in question ma-
rks why they laughed at me. Then one of the form 2 and 1
girl told me that it was not a pet it is an instrument
that is used in the laboratory.

For is to thank you Katie and Tom and all of you
who are sponsoring me, for your kind hearts because
you have helped me with open hands. May you
continue being blessed by God and may his blessings
be with you wherever you go. I love you all.

To the sigma pi scholarship

Hi, I hope you are fine, us here we are perfectly fine. We have no complaints about the school, the climate is well suitable for us and also the diet.

It's a new life for me at secondary school, we have started studying Maths, English, Kiswahili, Geography, history, computer Chemistry, physics, Biology, Business, Agriculture and C.R.E. My favourite subjects is Agriculture and Business. I really love Agriculture cause it involves land farming and factors concerning the environment, I also love Business cause when I grow up I would like to be a business lady and an Engineer.

I also love Drama classes, I love acting because it refreshes my mind and makes me know how people from other parts live. I also love singing cause I know I was talented in singing.

In school I don't feel lonely because I have got a friend who loves joking and giving me stories. She always makes me laugh so much, she is so playful and moreover she performs in her academics.

I really love this school. I love its buildings, its furnitures and also its school equipments. I'm really thankful for bringing me to this school and may God bless you with more than a thousand blessings.

Yours faithful Trizo wafula
~~Trizo~~

To: Sigma Pi Scholars

Hi! My name is Paris. How are you? I hope you are fine as I am. First I would like to thank you for your generosity. I had never experienced the kindness that you have shown us before. You are God's sent angels ~~last~~ In spite of you ~~to~~ not knowing who we really are.

I am doing good in school. Even if I had never been in a boarding school before, I am adapting. The life here seems to be very good and interesting.

My favorite class is History, because the teacher that is teaching us is a better teacher I had never met before. Her name is teacher Mary. On the other hand, the class that is challenging me is Mathematics. I really do not know why it is challenging me ~~to~~ now, yet I used to challenge it in primary school. I am putting more effort for me to challenge it instead. By the time I will challenge it, I will be very happy and at peace.

Something that I learned intell interesting, is ^a part of a computer called a flash disk. I had not heard of that name until when I got in this school. My first time to hear that name was when one of our fellow had lost her's. When she was asking about her lost flash disk I was eager to know what she was talking about. I had to ask her what it was. Instead of answering my question, she and other students that were listening at me ~~to~~ me, they end up laughing at me. They assumed that I was from the same world ~~to~~ with them, because they all have computers at their homes.

I am glad that I know now that is a computer, and how to use it. I learned all of this in my computer class. In our school we learn about computers.

I like music club. I joined it because I like being active and I also like ~~to~~ dancing a lot. I used to dance in my former school. I really hope that Tom can

tell you about that.

At the moment, I am looking forward to go to Masemo University. Tom and Katie promised us to go there to learn Mathematics for days. I know it will be of great help to me. I also want to see how universities looks like because I have never seen. To add to that, I want to go and meet the new friends. I like making friends a lot. It helps me to experience new things. Like that of a flash dish. That incident made me to wish that I had at least a computer. That is why I am looking forward to that day, so that when I will graduate from secondary school I will not know how an university looks like to avoid being laughed at.

My family is very okay. They sent me for their greetings and most especially my mam. She is very grateful for all you are doing for us.

I have a friend called Sharon. She is kind and loving. I like her characters. They are so impressing. I like making her happy when she is bored. She even makes me happy when I am sad. We do study together.

The school that I am in is very good, not only good but the best. I am in love with it.

I also what to tell you how Katie and Tom are very loving and caring. I are just wow!

From Paris Paris
Wambui.
